

The following is the list of **188 Logs Received** for the 2016 August UHF Contest as of **2359z, September 10, 2016**.

This list includes all receipted electronic submissions and is updated manually; we hope to be able to update it at least every other day, so please be patient if you don't see your call right away.

Please check your information carefully after it is posted here. If you have received a numbered receipt, the robot is satisfied that all of the information you submitted is acceptable. The robot has no way of knowing if all of the information is correct, however. For example, you may have indicated a category the robot recognizes, but it may not be the category in which you participated or intended to enter. If you discover an error in your category or Section information after it is posted, you may simply correct your Cabrillo file header and re-submit the entry.

PAPER LOGS will be added to the queue as they are transcribed which we hope to complete within a week after they are received in the mail.

If you have any questions, please contact me at uhfcontesthelp@gmail.com. Thanks and 73.

John, K9JK, Log Receipt Manager for the 2016 August UHF Contest
